Mailing Address: Wrasta road Bilal colony Hangu.

Objective:

Passionate and dedicated Flutter Developer with a solid understanding of mobile application development principles. Skilled in creating clean, reliable, and efficient code, with a focus on user experience and interface design. Seeking opportunities to leverage expertise in Flutter development to contribute to innovative projects and drive business growth.

Academic Qualifications:

Degree	Year/Session	University/Board
BSCS	2019-2023	Kohat University of Science and Technology.
Mobile Application Development	April 2022-continued...	Uzair Technology Bannu Road Kohat. (Software Company).

Professional Projects:

FYP Project:

1)Household:

Developed a mobile application called "Household" as the final year project using Flutter and Firebase. The application serves as a platform to connect users with household service providers, streamlining the process of accessing and booking various services.

Responsibilities and Features:

- Designed, implemented, and deployed the entire project independently.
- Utilized Firebase for backend services, including authentication, email verification, and authentication via phone number.
- Integrated Firebase Storage to store images uploaded by users and vendors.
- Implemented functionality to redirect messaging to WhatsApp and calls to the system call app for seamless communication.
- Developed two distinct sides of the application: user side and vendor side, each with its own authentication system managed through email verification.
- Service listing and availability management.

2)E-Cash:

Developed a mobile app using Firebase to facilitate commission-free cash transactions between users. The app enables users to deposit or withdraw money through user-to-user connections within a 1km radius using Google Maps, eliminating the need for traditional branchless banking services like Easy paisa, Jazz Cash, or U-Paisa.

Key Features:

- User Signup and Login (including Google Sign-In).
- Email verification and password recovery.
- Profile management (view, update, and delete).
- Google Maps integration for current location tracking.
- Post and retrieve E-cash/Money transfer requests based on proximity (1km radius).
- Manage posts (create, update, delete) with geolocation data.
- View post details with location on Google Maps.
- Communication facilitated through direct calls or WhatsApp.
- Secure logout and Google account management with Firebase.
- Auto-login if previously authenticated.

UI Projects:

Completed three UI projects in Flutter, demonstrating proficiency in creating visually appealing user interfaces.

1. Al-ather
2. Travel-Planner
3. E-Proper
- 4.

F u l l y F u n c t i o n a l P r o j e c t s :

1)Farmncho user and Farmer Side App:

Collaborated with a team to develop a fully functional Flutter application aimed at providing users with a seamless experience in browsing and listing products. The app utilized Flutter framework along with various APIs to achieve its functionalities.

Responsibilities:

- Worked collaboratively with a team to design and develop the product listing application.
- Implemented Provider state management and MVVM architecture to ensure efficient state handling and maintainable codebase.
- Implemented multi-languages.
- Developed "Add to Cart" functionality allowing users to easily select and save desired products for future purchase.
- Stripe Payment: Secure payment processing for seamless transactions.

2)AI Voice Changer:

Developed a mobile application called "Voice Changer" aimed at altering voices into various character voices. The app features a community platform where users can share their generated voices, interact with others through likes and comments, and even share their creations on social media platforms like WhatsApp, Facebook, and LinkedIn. Additionally, the app offers a blogging feature for users to engage with written content related to voice-changing techniques and tips.

Responsibilities Features:

- Integrated social media sharing capabilities for seamless sharing of generated voices on platforms like WhatsApp, Facebook, and LinkedIn etc.
- Access to informative blogs and articles related to voice-changing techniques.
- Integrated AI APIs to enable voice modulation with various character voices.
- Implemented Likes, Comments, Share to Community.

3)Prestige+ (User Side and Vendor Side App):

Developed a user-side platform for a Nigerian client enabling product sales using Prestige Points. The platform includes multiple shops with categorized products, allowing users to browse, add to cart, and place orders. Features like location tracking, push notifications, and QR code, searching functionalities enhance user engagement.

Responsibilities Features:

- Integrated multiple shops with categorized product listings.
- Implemented cart functionality for easy ordering.
- Utilized geolocation for current and shop location tracking.
- Enabled push notifications for order.
- Incorporated social features for friend invites and rewards.
- Integrated QR code generator and scanner.
- Added "Add to Favorite" feature for marking preferred products and shops.
- Applied pagination for improved user experience in browsing large datasets.
- Implemented a search feature for products, shops, and orders etc.
- Implemented monthly and weekly graphs for tracking sales and user engagement.

S k i l l s:

Front-end Designing:	User-friendly front-end designs for mobile
Programming Language:	Dart
Framework:	Flutter
API Integration:	REST API's
Backend:	Firebase
State Management:	Provider
Payment Integration:	Stripe
