SUMMARY

Full Stack AI Developer with experience in Python (Django, FastAPI) and React, specializing in building scalable web applications and AI-powered automation. Proven ability to integrate LLMs and OCR pipelines into production systems — delivering a document extraction feature processing large invoices in under 10 seconds using only free APIs. Gold Medalist BSc Software Engineering graduate with hands-on expertise in secure API design, database optimization (PostgreSQL, MongoDB), and prompt engineering.

EXPERIENCE

Troon Technologies — IslamabadNov 2024 – Present

Full Stack AI Developer Intern

Project 1: AI Document Extraction (Inventory & Billing Platform)

- Built an end-to-end AI pipeline using LLM Whisperer (OCR) + Groq LLM to extract data from invoices and cheques, auto-filling React forms via FastAPI — achieving under 10 seconds response with zero paid APIs.
- Designed structured JSON contracts between backend and frontend, covering all invoice and cheque types (sales, purchase, payments).
- Replaced Gemini with LLM Whisperer + Groq after accuracy issues, significantly improving reliability under free-API constraints.

Project 2: AI Compliance & Document Validation Platform

- Developed FastAPI backend endpoints for OCR-based document analysis and bylaw compliance validation of architectural plans and map requests.
- Built user role management, map request workflows, and data filtering features in a React (Vite) + FastAPI + MongoDB stack.
- Integrated AI validation services to automate regulatory document checks, reducing manual review effort.

Department of IOC — Kohat UniversityAug 2024 – Jan 2025

Full Stack Developer

- Architected a complete FYP Management System using Django REST Framework and React, with Role-Based Access Control (RBAC) for all user types.
- Designed and optimized a PostgreSQL relational schema and secured CRUD APIs for end-to-end project submission and tracking workflows.

EDUCATION

Kohat University of Science and Technology2021 – 2025

BSc Software Engineering **Gold Medalist** | GPA: 3.87 / 4.0

SKILLS

Backend	Python, Django, DRF, FastAPI
Frontend	React.js, Tailwind CSS, JavaScript
Databases	PostgreSQL, MongoDB, MySQL
AI & LLMs	LLM Integration, Groq API, LLM Whisperer, Prompt Engineering
Tools	Git, GitHub, Unicorn, Uvicorn, Linux, REST API Design

CERTIFICATIONS

Meta: Django Back-End Development | Database Engineering | Version Control (Git)
